ABOUT ME

I am a dedicated and ambitious Software and Information Engineering student at Singidunum University with a strong passion for programming, web development, and modern technologies. My academic background has provided me with a solid understanding of software design, data structures, and database systems, while my practical experience includes working with JavaScript, React, Kotlin, SQL, and Python.

Throughout my studies, I have developed a growing interest in both frontend and backend development, as well as in software quality assurance and testing. I enjoy learning new technologies, improving my problem-solving abilities, and building creative and user-friendly digital solutions.

WORK EXPERIENCE

INTERNSHIP FULL-STACK DEVELOPER – ELEKTROMREŽA SRBIJE – 01/12/2025 – 01/02/2026 – BELGRADE, SERBIA

- Developed full stack web applications with emphasis on backend logic and database design.
- Designed and optimized database schemas and managed databases using PostgreSQL and DBeaver.
- Created UML diagrams, including activity and sequence diagrams, to define workflows and business logic.
- Built responsive frontend interfaces using React, Next.js, JavaScript, and Tailwind CSS.
- Wrote SQL queries and designed relational data models for efficient data handling.

EMPLOYEE – MOND LINE PRO D.O.O – 01/06/2025 – 01/09/2025 – BELGRADE, SERBIA

- Managed cash register operations and processed customer payments accurately.
- Filled and updated advance invoices, ensuring precise record-keeping.
- Assisted with client management and administrative tasks.
- Gained experience in teamwork, professional communication, organization, and attention to detail.

FREELANCE WEB DESIGNER – 2023 – Current – BELGRADE, SERBIA

- Designed banners, social media content, and websites for small clients.
- Utilized React, Tailwind CSS, JavaScript, and design tools to create responsive and visually appealing digital solutions.
- Learned project management skills and how to meet client requirements under deadlines.

PROJECTS

Mobile Application Development

- Developed an Android mobile application using **Kotlin in Android Studio**.
- Implemented features for tracking payments and online orders.
- Integrated Firebase for data storage and real-time updates.
- Focused on creating a clean, user-friendly interface and ensuring smooth app performance.

IBM Software Modeling Project

- Completed as part of the **IBM Software Basics and Modeling program.**
- Created UML diagrams to represent software structure and workflows.
- Learned software lifecycle stages, requirement analysis, and system design principles.
- Gained hands-on experience with modeling tools and documentation practices.

InternShip Project

- Built a Zoo app from scratch, designing both frontend and backend functionality.
- Implemented interactive features for exploring animals, exhibits, and educational content.
- Gained hands-on experience in full stack development and application design.

Client-Side Web Application – University Project

- Developed a modern web application as part of the Client-Side Web Applications course.
- Used React for building an interactive and responsive user interface.
- Connected the application to a custom database for storing and retrieving data dynamically.
- Applied HTML, CSS, and JavaScript principles to ensure a seamless frontend experience.
- Focused on clean code structure, component reusability, and efficient state management.

CERTIFICATIONS

DigiEdu Hackathon
3rd Place – DigiEdu Hackathon 2025

- Participated in a national hackathon focused on digital innovation in education.
- Developed a web-based solution for personalized learning, designed to adapt content to individual users.
- Utilized PHP, React, and SQL for backend, frontend, and database implementation.
- Applied UI/UX design principles to ensure user-friendly interaction and accessibility.
- Awarded 3rd place among 80 participants for innovation, technical quality, and presentation.
